carloshuayamares

Backend Developer with over 4 years of experience building cloud and serverless solutions on AWS, applying SOLID principles and engineering best practices. Certified AWS Developer Associate, with a focus on scalable, secure, and high-performance architectures that drive business efficiency.

EDUCATION & CERTIFICATIONS

Lima, Perú

- Bachelor of Telecommunications Engineering (National University of Engineering) 2016 - 2021
- AWS Certified Developer Associate (Amazon Web Services Training and Certification) 2025 - 2028

WORK EXPERIENCE

Backend Developer. SOFTTEK.

Oct 2023 - Currently

- Led the migration of on-premise services to AWS Cloud, implementing a clean hexagonal architecture based on microservices.
- Designed and implemented complex business workflows using Step Functions, Lambda, SQS, S3 triggers, and API Gateway, optimizing process automation and orchestration.
- Replicated complete on-premise services to the cloud, integrating microservices and event-driven components deployed within secure VPCs and EC2 environments when required.
- Improved Oracle and MySQL on-premise database query performance, increasing processing efficiency through optimized transactions.
- Managed automation and deployment using Serverless Framework, unit testing with Jest, documentation with OpenAPI 3, quality control with SonarQube, and Azure DevOps for continuous integration and deployment (CI/CD) across different stages.
- Developed dynamic reporting solutions with JasperReports, integrating data from DynamoDB and S3 for automated document generation.

Backend Developer. ENOTRIA SA.

Jun 2023 - Oct 2023

- Responsible for developing serverless applications using AWS Lambda and Node.js with Fastify, integrating services such as API Gateway, SQS, S3, DynamoDB, and Step Functions.
- Implemented unit testing with Jest.js for Lambda functions integrated with API Gateway, and documented developments using Swagger (OpenAPI) to ensure traceability and code quality.
- Applied SOLID principles and refactored controllers and services based on NestJS, improving system readability, scalability, and efficiency.
- Managed database connections with MySQL, PostgreSQL, and MongoDB, handling communication and data exchange between backend and frontend systems.
- Implemented Kafka alongside AWS services for event-driven architecture and distributed messaging.
- Collaborated in an agile environment, using GitHub for version control and team-based development workflows.

Full Stack Developer. UNCODEIT CONSULTING SAC.

Mar 2021 - Mar 2023

- Developed web services based on NestJS, applying the MVC pattern and SOLID principles to ensure clean, maintainable, and scalable code.
- Responsible for creating and deploying Node.js applications using Express and Fastify, containerized with Docker and deployed in Kubernetes PODs, achieving stable, scalable, and maintainable services.
- Designed, developed, and integrated internal and external APIs for Entel Perú's network, connecting multiple databases and handling critical data ingestion processes.
- Front-end development with React, building dynamic, reusable components, implementing state management (Context API/Redux), consuming REST and GraphQL APIs, and optimizing performance through best practices and modern React patterns (hooks, code splitting, memoization).
- Actively collaborated in multidisciplinary teams under agile methodologies (SCRUM), using GitLab and Jenkins for continuous integration and deployment (CI/CD), and GitHub as the main code repository.
- Completed AWS training (Lambda, API Gateway, S3), enabling participation in cloud-based serverless projects and strengthening expertise in cloud architectures.

SKILLS

NodeJS ● Advanced

TypeScript ● Intermediate

AWS ● Advanced

MongoDB ● Advanced

NestJS ● Intermediate

Docker ● Intermediate

JestJS ● Advanced

Swagger ● Intermediate

Jenkins ● Intermediate

Git/GitLab ● Advanced

Cybersecurity ● Intermediate

Networking ● Intermediate

SO: Linux ● Intermediate

Python ● Intermediate

Ingles ● Intermediate
